Ønske Table System

Ønske Table

The Onske table system retains a delicate aesthetic to contrast its capability. It has an infinite length that can be used as a boardroom, breakout, cafe or meeting table.

Bases include a single foot, double foot or four-star configuration, depending on size and use, which can be powdercoated to match any interior.

Available at 450mm and 740mm heights, with two standard glide and castor options. A flip version is also available.

The range is made from recycled aluminium content and made in an ISO14001 certified factory.
